

**What is claimed is:**

1. A display apparatus, comprising:  
a display panel;  
a chassis; and  
a plurality of double-faced adhesive tapes interposed between and adhering to the back surface of the display panel and the chassis for attaching the chassis to the display panel,  
wherein each of the double-faced adhesive tapes has an adhesive strength smaller than a peel force produced by a strain in its width direction which is caused by a tension in its longitudinal direction.
2. A display apparatus according to claim 1, wherein said double-faced adhesive tape has a shear adhesive strength of smaller than or equal to  $60\text{N/cm}^2$ .
3. A display apparatus according to claim 3, wherein said double-faced adhesive tape consists of a base material having a breaking elongation rate of more than or equal to 300 percent.
4. A display apparatus according to claim 1, wherein said double-faced adhesive tape has an end protruding outwardly beyond ends of both said display panel and said chassis or beyond an end of one of said display panel and said chassis.
